1 February 2022

3 years + 1 year extension

FTS Reference:

2021/S 000-027756

Hub Contact:E: corporate.services@eocph.nhs.uk

Background

The East of England NHS Collaborative Procurement Hub's framework for the Provision of Specialised Reporting for Heart and Lung Checks supports contracting authorities with current and future day to day requirements that meet the highest industry standards.

The framework offers a cost effective, value for money solution, using suitably qualified and skilled personnel to deliver radiology reporting and image interpretation for Heart and Lung Checks. The framework has been based on the standards and requirements provided by the NHSE pilot scheme for the Targeted Lung Health Checks Programme and is a compliant route to market for not only the contracting authorities that are captured within the pilot schemes but all other contracting authorities that wish to undertake these services.

All consultant radiologists are experienced in lung cancer screening / providing cardiothoracic radiology and meet standards as per RCR and BSTI guidance for lung cancer screening.

Contract Benefits

- Contributes to improvements in patient care
- Supports the recognised pilot programmes currently being run by NHSE
- Uses experienced radiologists in lung cancer and cardiothoracic
- Improves health through socially responsible procurement
- Reduces environmental impact through socially responsible procurement
- Shares best practice and expertise
- Introduces a framework which is a better option for suppliers
- Offers focus and clarity for stakeholders and suppliers

The Hub is a collaborative NHS organisation that works with customers by using procurement and commercial expertise to drive value and efficiencies across the NHS
