

# Childhood Weight Management Training

## Background

In 2009/10, the Hub was appointed to manage a national framework produced by the Cross-Government Obesity Unit (CGOU) to support the local commissioning of services to help overweight and obese children move towards and maintain a healthier weight.

## Role of the Collaborative Procurement Hub

As well as supporting a number of Trusts in the East of England in successfully implementing their contracts locally, the Hub travelled outside of the region to offer guidance and support to the Department of Health Public Health and Social Care Directorate's Regional leads for obesity and food, by providing advice to Commissioners throughout England in using the framework.

## Outcomes

The framework enabled commissioners to quickly and easily procure providers who could offer appropriate training services for people who would be working directly with overweight children and their families to help achieve their goals.
